

QUELINE RESCUE TOOLS ENT.

FIREMAN'S GLOVES

- Made of a specially tanned side split cowhide for superior grip and tactile sensitivity even after repeated soakings. Additional palm and thumb crotch reinforcement in critical wear area prolongs glove life. Liquid-proof liner protects against blood borne pathogens and bacteria while remaining flexible in subzero temperatures. Pryotect Barricade barrier is compliant with the requirements for resistance to common chemicals and for resistance to viral and blood borne pathogens as specified in the NFPA 1971-2007 Edition. The 4" Nomex cuff provides better fit in today's new turnout gear. Kevlar stitching won't support combustion. Interior leather hang tag loop facilitates fast drying and storage. Made in the USA -, SEI certified.

Brand: Alliance, made in USA
Model: Responseguard

- An economic double chromium-tanned suede leather glove that. Meets the thermal and durability requirements of NFPA 1971.
- PRO-TECT™ Moisture Barrier by Insert Technology Inc., 100% Waterproof/wind-resistant, with excellent abrasion, odor and fungal resistance, low temp flexibility, and a monolithic, single layer to provide a soft hand
